

FOR IMMEDIATE RELEASE

DEWALT Announces New 20V MAX* Brushless Lithium Ion Drywall Screwgun with Extreme Runtime

TOWSON, MD (February 4, 2015) – New to its 20V MAX* line of power tools, DEWALT announces the launch of the **DCF620** 20V MAX* XR™ Brushless Lithium Ion Drywall Screwgun with Extreme Runtime which allows drywall carpenters to Get More Done™ without power cords. The new drywall screwgun is ideal for both residential and commercial drywall hanging applications – driving screws into both wood and steel studs. “Performance and productivity are two of the most important things to drywall users when looking for a new screwgun,” says Lauren Chell, product manager for DEWALT. “Drywall professionals were formerly concerned with cordless equipment because frequently it provided slower speeds and offered limited runtimes compared to corded versions, and was heavy, and expensive. These are no longer issues – the new 20V MAX* Brushless Lithium Ion Drywall Screwgun with Extreme Runtime is the tool a professional needs to get the job done.”

Featuring a DEWALT-built brushless motor the **DCF620** will be available with either two 2.0Ah (DCF620D2) or two 4.0Ah (DCF620M2) XR™ high capacity lithium ion battery packs with fuel gauges. One 2.0Ah battery (DCB203) allows the user to hang up to 45 sheets** while one 4.0Ah battery (DCB204) allows the user to hang up to 58 sheets***. For users already invested in the 20V MAX* system, the screwgun will also be available as a bare tool (DCF620B).

In addition to the convenience and time savings associated with not dragging around a cord, the **DCF620** cordless screwgun also offers users 4,400 RPM [no load speed], which is the speed expected of a corded screwgun, in a cordless package. The screwgun packs high performance into a small, lightweight package weighing only 3.3 lbs with a DEWALT 2.0Ah battery pack, and measuring only 8-³/₄” in head length (both shorter and lighter than DEWALT’s leading corded screwgun offering). Other features include an adjustable driving depth nosecone that locks to the tool, a trigger lock-on switch, an LED light with 20 second delay, and a belt clip.

A Collated Screw Auto-Feed Magazine Attachment (**DCF6201**) will be available separately for users looking to drive collated strips of screws. Collated screw systems allow users to work fast, while minimizing dropped/wasted screws. The **DCF620** cordless screwgun

can be converted to and from an auto feed system with the new DCF6201 magazine attachment without using a tool. The attachment is capable of driving collated screws up to 2” in length and is compatible with most major screw strip brands on the market.

The new **DCF620** 20V MAX* Brushless Lithium Ion Drywall Screwgun with Extreme Runtime will be available in April everywhere DEWALT products are sold. The **DCF620** is sold as a bare unit (DCF620B: \$139.00), kitted with two 20V MAX* Lithium Ion 2.0Ah batteries (DCF620D2: \$199.00), or kitted with two 4.0Ah Lithium Ion batteries (DCF620M2: \$269.00). The screwgun has a three year limited warranty, a one year free service contract and a 90 day money-back guarantee. The collated magazine attachment (DCF6201: \$99.00) will be sold separately. See a video of the screwgun in action [here](#). For information on available accessories, visit www.dewalt.com.

*Maximum initial battery voltage (measured without a workload) is 20 volts. Nominal voltage is 18.

**4'x 8'x 1/2" drywall on 2" x 4" pine studs with 1-1/4" coarse thread black-coated drywall screws (based on 50 screws per board).

***4'x 8'x 5/8" drywall on 20 g steel stud with 1-1/4" fine thread black-coated drywall screws (based on 50 screws per board).
