

SpeedFlex® Track Top Gasket
(Part No. TTG350F, TTG600F)

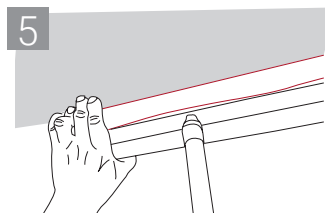

Pull end of TTG from center of roll.
Peel optional adhesive from end.

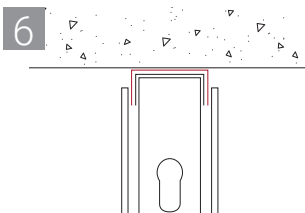

Place TTG at one end of track and
center along its entire length.

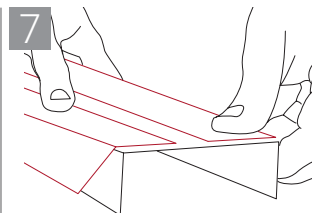

Flip track and cut TTG along
other end of track.

Secure track to floor/ceiling
as described in reference wall
design.

Verify that downward projecting
flaps are sandwiched between
gypsum board and steel ceiling
track. Seams in adjoining lengths
of gasket may be butted or
overlapped.

The TTG350F can be cut
along the center perforation
to be placed on wider
tracks.
